Department of Computer Science, UCSD *Graduate Student Researcher*
San Diego, USA. September 2009 -
"Annotating the Worlds Oceans: Computer Vision Methods for Scientific Data Analysis"
Advisor: Professor David Kriegman

- Texture based recognition & segmentation in organic images.
- Cost sensitive learning for Support Vector Machines and boosting.
- Multispectral methods for underwater computer vision.
- CoralNet: a web portal for automated benthic images analysis (coralnet.ucsd.edu)
  - Manual and automated annotation of user uploaded images
  - Used by researchers, agencies and private parties globally
  - Provides an ever-growing web-scale dataset for texture based image analysis.

Department of Mathematics, Lund University *M.S. Thesis Scholar*
Lund, Sweden September 2006 - March 2007
"Single Image Focus Level Assessment Using Support Vector Machines"
Advisor: Professor Karl Åstrom.
Thesis done in collaboration with a Cellavision AB. Cellavision manufactures equipment for automatic analysis of blood smears. (cellavision.com)

- Developed novel method for autofocus that utilize a multi-class machine learning methodology and low-level image features, including color and texture. The method is protected with an international patent, and it's implemented in the Cellavision products. The Master's thesis report received several awards.
- Worked with Cellavision engineers to collect training and test data.

Department of Mathematics *Research Assistant*
Lund, Sweden March 2007 - June 2007
SME-robot is a large, international EU financed project. (www.smerobot.org)

- Worked on robot camera calibration using structure from motion.

PROFESSIONAL EXPERIENCE

Microsoft Research *Research Intern*
Seattle, WA July 2013 - September 2013
Microsoft Research is one of the largest computer science research institutions in the world. I was a summer intern in the Computational User Experience group where I worked with Neel Joshi and Dan Morris on estimating nutritional information from images of food. (research.microsoft.com)

- Project scoping, definition, and investigation of related work.
- Managed data collection from several food vendors
- Developed novel algorithms for robust nutritional estimation from food images.

Hövding AB *Head of Research*
Malmö, Sweden June 2007 - September 2009
I was the first employee at Hövding, the company behind the "invisible" bicycle helmet with the same name. The helmet is a collar that is worn around the neck. It contains a folded up airbag that inflates and protects the user in the event of an accident. Hövding received the 2011 Index Award. (hovding.com)

- Responsible for hardware and software development for the accident detection system.
- Developed a real time algorithm, based on machine learning, that takes data from motion sensors as input, and determines if a rider is in an accident. International patent is pending.
- Managed large-scale data collection with stunt actors and students.
- Worked with subcontractors to develop and identify electronic components
- Hired, and managed a team of engineers.

McKinsey & Company *Junior Consultant*
Stockholm, Sweden June 2005 - September 2005
McKinsey is a management consulting firm, advising corporations, banks, and holding companies on strategic and tactical issues. (mckinsey.com)

- Worked in a small team to quickly collect and analyze data for tasks such as mergers & acquisitions, procurement, and marketing.
